

ENFit™ IMPLEMENTATION

The first phase to introduce the ENFit™ standard has now been completed with the distribution of ENFit™ giving sets.

PHASE 1

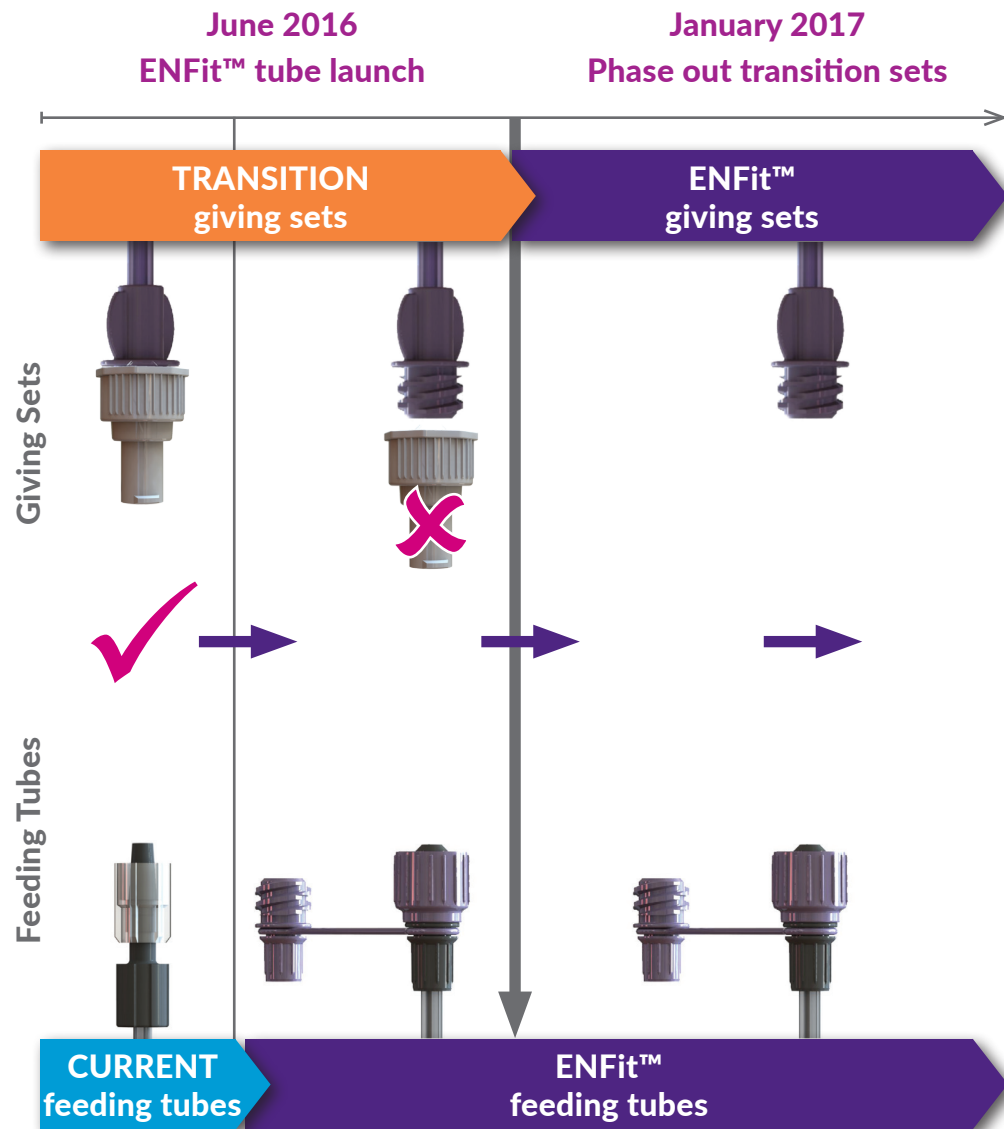

Transition giving sets now in use

PHASE 2

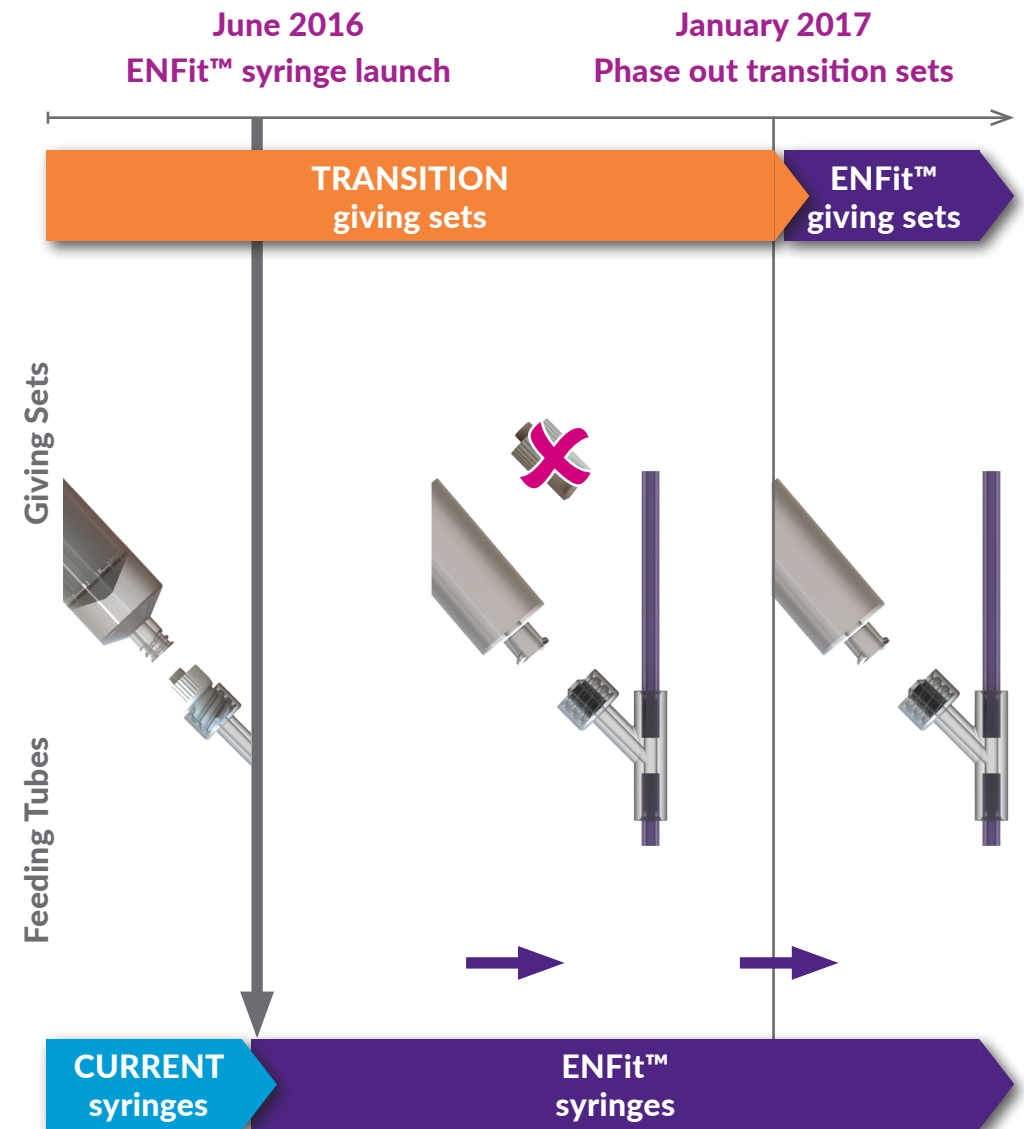

Feeding tubes, syringes & other ancillary items are changing

ENFit™ TRANSITION SETS: PATIENT-END CONNECTION

ENFit™ TRANSITION SETS: MEDICATION PORT CONNECTION

After the scheduled transition period there will only be final ENFit™ giving sets and tube connectors (with applicable syringes and medication ports) available. However, there will remain a possibility to order loose adaptors ensuring compatibility with 'old' feeding tubes and syringes.

ENFit™ TRANSITION SETS: ORDER CODES

Effective June 2016
